Abstract

An overview of the creation and operation of Meta Surgical, a cutting-edge online store specialising in surgical supplies and equipment, is given in this project report. The paper identifies the important elements, tools, and techniques used to build an effective and user-friendly web site for the medical industry. A comprehensive product catalogue with in-depth explanations, pictures, and prices is available on the internet. To enable simple and safe transactions, it also incorporates a secure digital payment mechanism. The introduction of advanced searching and filtering functions, which enable customers to rapidly identify particular goods based on numerous factors including brand, category, and specs, is also covered in the paper. Additionally, customised user profiles were created, allowing consumers to retain their preferences, follow orders, and get recommendations that are specifically suited to them. The project report also examines Meta Surgical's backend architecture, including its order processing, inventory management, and database management systems. In order to protect sensitive user details and guarantee data privacy, it investigates the incorporation of strong encryption technologies. In conclusion, this Meta Surgical online store project shows how a user-centric and technologically cutting-edge platform can be successfully developed to meet the unique demands of the medical community. Meta Surgical seeks to revolutionise the way surgical supplies are purchased by enhancing accessibility, product availability, and transaction security, promoting effectiveness and dependability in the healthcare sector.

1. Introduction

1.1 Objective

For an existing business, this project is an online purchase platform. Creating an online store for Meta Surgical Industries is the project's goal. In December 2013, Meta Surgical Industries was established with the mission of enhancing healthcare and medical services by providing a broad range of disposable surgical supplies. All of their goods – both those they buy and those they produce themselves – are of a high calibre and conform to international standards. By adhering to the accepted industrial standards, they have gained the trust of a sizable clientele distributed throughout the nation and the world. Their main need is to offer flawless services. They collaborate with public and private sector distributors of medical and surgical products. The most modern and convenient packaging is used for their products. They strive to deliver on schedule. Quality control and customer satisfaction are their top goals.

Online buying is the practise of customers making real-time, direct purchases from a supplier over the Internet of items like diapers, gloves, nebulizers, surgical gloves and headgear. It's a particular form of electronic trading. The project aims to open up internet shopping to customers of traditional retailers. It allows you to shop at a store using a digital device from any location in the world. This will allow the user to purchase items from his preferred shop online and have them delivered to his home. Full web assistance is required to create such a website. Building a comprehensive and efficient website that can enable online shopping is the project's main goal.

1.2 Motivation

The motivation behind the Meta Surgical online store project is to alleviate the difficulties that people have in obtaining crucial healthcare supplies. The project aims to provide an easy-to-use system for the speedy purchasing of goods including diapers, sanitary napkins, nebulizers, medical gloves, etc. The main goal is to guarantee simple access to necessary medical supplies, particularly in emergency situations like the COVID-19 epidemic. In order to give people a dependable and effective way to get these essentials, Meta Surgical offers a wide selection of products, including things for respiratory health, personal cleanliness, and medical supplies. The dedication to the comfort and welfare of clients is also a motive. Meta Surgical seeks to give those in need of these things a one-stop shop for all of their healthcare needs, saving them time and energy in their quest.

1.3 Product Perspective

Numerous elements on our suggested website are available to store managers as well as customers. This website will enable anyone who wishes to purchase

surgical supplies online to do so. Customers will have access to online shopping choices where they can search for and read extensive descriptions of the products they've chosen. Customers may browse shops to find what they desire. Customers will be able to make purchases using this website without going to a store. The tools that will be utilised to build a user-friendly website include PHP, MySQL, CSS, Xampp server, and Javascript.

2. Tools used

- **PHP (Hypertext preprocessor)**- Popular server-side programming language for building websites is PHP. Many developers choose it since it is open-source and simple to learn. PHP makes it possible to create dynamic content, connect to databases, and handle forms. Because of its syntax's resemblance to C language and Perl, programmers may create flexible, robust programmes. Different web servers and operating systems are compatible with PHP. It has a sizable community and copious documentation, providing a wealth of options for help and education. With regular upgrades and new features boosting its usefulness and speed, PHP is still changing.
- **MySQL** - A popular relational database management system (RDBMS) that is freely available is MySQL. It offers a reliable and expandable method for structuring and organising data. Numerous operating systems are supported by MySQL, which also offers a wide range of programming language compatibility. Through SQL queries, it allows for effective data retrieval and processing. MySQL offers sophisticated features like replication, transactions, and security controls to guarantee the confidentiality and integrity of data. Since it has a sizable and engaged community, MySQL receives regular updates and development, making it a dependable option for applications that range from modest-sized projects to enterprise-level applications.
- **Xampp** - Cross-platform software called XAMPP makes it easier to set up local web development environments. It contains the web server Apache, the database management system MySQL, the scripting language PHP, and the programming language Perl. By making it easier to set up a development server, XAMPP enables programmers to test their apps locally while working offline. It offers a simple user interface for establishing settings and controlling server components. Because it works with many different operating systems and is widely utilised for web development, XAMPP is a great option for both novices and experts.
- **Bootstrap** - The open-sourced front-end framework Bootstrap makes web development easier. It offers a selection of pre-designed templates, CSS themes, and JavaScript elements that make it easier to build websites that are both responsive and aesthetically pleasing. Developers can create designs that are cross-browser compatible and optimised for mobile rapidly with Bootstrap. It provides a grid system for managing layouts, a variety of UI elements including buttons,

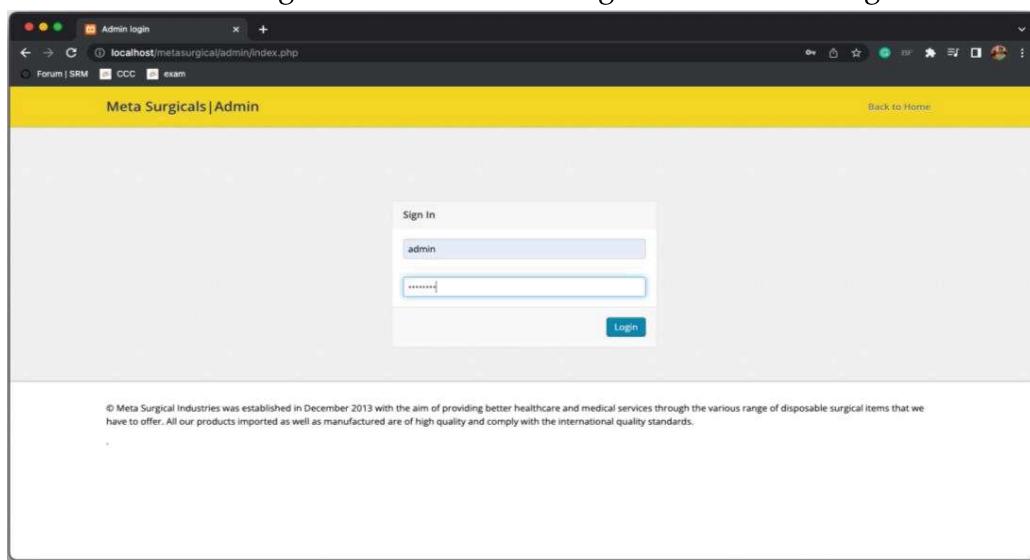

forms, and navigation bars, as well as a responsive design strategy. It's simple to learn and customise Bootstrap because to its thorough documentation and vibrant community. It is still a top option for quickly creating cutting-edge, responsive web apps.

- **JavaScript** - A flexible and popular programming language, JavaScript mostly works with the client-side of designing websites. It enables developers to change HTML text, manage events, produce animations, and communicate with APIs, adding interaction and dynamic features to webpages. All current browsers support JavaScript, which can additionally be utilised on the server-side using tools like Node.js. It provides a variety of libraries and frameworks, like React and Angular, to improve its capacity for creating sophisticated applications. JavaScript is a mainstay of web development thanks to its adaptability, wide ecosystem, and ongoing progress.
- **CSS** - CSS, short for Cascading Style Sheets, is a fundamental technology used in web development to control the presentation and layout of HTML elements. It enables developers to define styles, colors, fonts, and positioning for web pages, ensuring consistent and visually appealing designs. CSS works in conjunction with HTML and allows for the separation of content and presentation. It offers selectors, properties, and values to target specific elements and apply desired styles. CSS is supported by all modern web browsers and plays a crucial role in creating engaging and responsive user interfaces on the web.

3. Implementation and User Interface

Functions related to Admin

- **Login** - To get to the admin panel, the administrator must log into the system with his login and password.
- **Manage Products** -
 - **Add Products** - The items may be categorised into several groups based on features and names. The system's administrator may add new goods, replete with each of their specifications and associated photos.
 - **Delete Products** - The admin has the ability to delete products based on their stock availability.
 - **Edit Products** - The admin has the ability to change the details of the products.
 - **Search Products** - A record of all the goods that are now accessible will be visible to the administrator. He might also search for a product by name.
 - **Add Categories and Sub Categories** - Admin have the ability add a category and sub category by giving the necessary information.
 - **Delete Categories and Sub Categories** - The admin has the ability to delete Categories and Sub Categories based on their stock availability.
 - **Edit Categories and Sub Categories** - The admin has the ability to change the details of the Categories and Sub Categories.

©Meta Surgical Industries was established in December 2013 with the aim of providing better healthcare and medical services through the various range of disposable surgical items that we have to offer. All our products imported as well as manufactured are of high quality and comply with the international quality standards.

The screenshot shows a web browser window for 'Meta Surgical | Admin' at the URL 'localhost/metasurgical/admin/edit-category.php?id=19'. The left sidebar contains navigation links: Order Management (selected), Manage users, Create Category, Create Sub Category, Insert Product, Manage Product, User Login Log, and Logout. The main content area has a title 'Category' and a success message 'Well done! Category Updated !!'. It includes fields for 'Category Name' (set to 'Capsules') and 'Description' (set to 'Capsules and syrups'), with an 'Update' button below.

The screenshot shows a web browser window titled "Admin Edit SubCategory". The URL is "localhost:metasurgical/admin/edit-subcategory.php?id=16". The page has a yellow header bar with the text "Meta Surgicals | Admin" and a user icon. On the left, there's a sidebar with navigation links: "Order Management", "Manage users", "Create Category", "Create Sub Category", "Insert Product", "Manage Product", "User Login Log", and "Logout". The main content area is titled "Edit SubCategory" and contains a green success message box with the text "Well done! Sub-Category Updated !!". Below the message are two input fields: "Category" set to "Capsules" and "SubCategory Name" set to "syrup". There is also an "Update" button.

5	Adult Diapers Premium (Medium)	Diapers	Adult Diapers	Matrix	2022-01-25 11:05:15	

At the bottom of the table, it says "Showing 1 to 5 of 5 entries". Above the table, there is a red notification box with the text "Oh snap! Product deleted !!". Below the table, there is a footer note: "©Meta Surgical Industries was established in December 2013 with the aim of providing better healthcare and medical services through the various range of disposable surgical items that we have to offer. All our products imported as well as manufactured are of high quality and comply with the international quality standards."

■ Manage Users -

- **Monitor Users** - A record of every user who have registered for the system will be visible to the administrator. The administrator may view all of the information about each user on the list except from their password.
- **Add Users** - The administrator can quickly add a new user by providing the required details.

The screenshot shows a web browser window titled "Admin| Pending Orders" with the URL "localhost/metasurgical/admin/delivered-orders.php". The page has a yellow header bar with the text "Meta Surgical | Admin" and a user profile icon. On the left, there is a sidebar with navigation links: Order Management (selected), Manage users, Create Category, Create Sub Category, Insert Product, Manage Product, User Login Log, and Logout. The main content area is titled "Pending Orders" and contains a table with the following data:

#	Name	Email /Contact no	Shipping Address	Product	Qty	Amount	Orn Da
1	kushal	kushalchow222@gmail.com/7210789789	15-11-112,vdos colony,Khammam,Telangana-507002	Adult Diapers Premium (Medium)	1	300	20-01-01-
2	aravind	aravind@gmail.com/9123456789	15-11-113,Khammam,Telangana-507002	Head Cap	1	400	20-04-07-

At the bottom of the table, it says "Showing 1 to 2 of 2 entries". Below the table, there is a footer note: "©Meta Surgical Industries was established in December 2013 with the aim of providing better healthcare and medical services through the various range of disposable surgical items that we have to offer. All our products imported as well as manufactured are of high quality and comply with the international quality standards."

- **Manages orders -**

- *Inspect Order* - The administrator has access to the orders created by the users. He can look up the specifics of the acquisition.

Change Password - The user can modify his account's password.

The screenshot shows a web browser window titled "Admin| Change Password" with the URL "localhost/metasurgical/admin/change-password.php". The page has a yellow header bar with the text "Meta Surgical | Admin" and a user profile icon labeled "Admin". Below the header is a sidebar menu with the following items: "Order Management" (selected), "Manage users", "Create Category", "Create Sub Category", "Insert Product", "Manage Product", "User Login Log", and "Logout". The main content area is titled "Admin Change Password" and contains three input fields: "Current Password" (disabled), "New Password" (disabled), and "Confirm Password" (disabled). A "Submit" button is located below the input fields. At the bottom of the page, there is a small copyright notice: "©Meta Surgical Industries was established in December 2013 with the aim of providing better healthcare and medical services through the various range of disposable surgical items that we have to offer. All our products imported as well as manufactured are of high quality and comply with the international quality standards."

Functions related to User

- *Registration* - Someone who is new needs to first sign up in the platform by providing the relevant information in order to browse the items on the website.

- **Login** - A user must provide his login information and password in order to access the system after registration.

The screenshot shows a web browser window with two forms: 'SIGN IN' on the left and 'CREATE A NEW ACCOUNT' on the right. Both forms are titled in bold capital letters. The 'SIGN IN' form has fields for 'Email Address *' and 'Password *'. The 'CREATE A NEW ACCOUNT' form has fields for 'Full Name *', 'Email Address *', 'Contact No. *', 'Password *', and 'Confirm Password *'. Both forms include a 'Forgot your Password?' link and a 'LOGIN' or 'SIGN UP' button. The URL in the address bar is `localhost/metasurgical/login.php`.

This screenshot shows the same 'SIGN IN' and 'CREATE A NEW ACCOUNT' forms as the previous one, but now they are part of a larger website layout. At the top, there is a yellow navigation bar with tabs for 'HOME', 'HEAD CAPS', 'PADS', 'FACE MASK', 'DIAPERS', 'WET WIPES', and 'NEBULISER'. Below the navigation bar, the 'SIGN IN' and 'CREATE A NEW ACCOUNT' forms are displayed. The URL in the address bar is `localhost/metasurgical/login.php`. The page also includes a breadcrumb navigation at the bottom left: 'Home / Authentication'.

- **View Products** - The user can examine a list of items based on their names after successfully log in. Users may examine a comprehensive overview of a product that includes the name, specifications, price, and image of the item.

Made from 100% virgin raw material
 Available in 2ply/3ply and 4ply
 Available in Elastic (Loop) & Ribbon (Tie-On) Type
 Colors Available: Blue, Green & White
 Packing: 100 Pcs in a Box
 Certification: CE, ISO 9001: 2015

REALTED PRODUCTS

The screenshot shows a product details page for 'Under Pads'. At the top, there's a navigation bar with links like 'Forum | SRM', 'CCC', and 'exam'. Below the navigation is a product image of a blue box of 'Under Pads'. To the right of the image, there are several product specifications: Size (Extra Large: 120 ~ 170 cm/48" ~ 68"), Packaging (10 Pcs in a Packet), Certification (CE, ISO 9001: 2015), and MADE IN INDIA. Below these details, there's a section titled 'REALTED PRODUCTS' featuring three similar products: 'Adult Diapers Premium (Extra Large)', 'Adult Diapers Premium (Large)', and 'Adult Diapers Premium (Medium)'. Each product has a small image, a title, a rating (4 stars), and a price (Rs. 350, Rs. 400, and Rs. 300 respectively).

- **Search Product** - A description of an item can be used by users when looking for it on the website.

The screenshot shows the homepage of the 'Meta Surgical' website. At the top, there's a navigation bar with links for 'Welcome -shiva', 'My Account', 'Wishlist', 'My Cart', 'Admin', and 'Logout'. Below the navigation is a search bar containing the text 'face mask'. To the right of the search bar is a 'CART - RS. 00.00' button. On the left, there's a sidebar titled 'CATEGORIES' with links for HEAD CAPS, PADS, FACE MASK, DIAPERS, WET WIPES, NEBULISER, GLOVES, and CAPSULES. The main content area features a large banner for 'SURGICAL HAND GLOVES' with a 'Offer Price Upto 70% OFF' and a note that they are '100 % waterproof protects against detergents, acids & other chemical'. Below the banner are images of various surgical glove boxes, including 'Matrix SPARK', 'Matrix STAR', and 'Matrix Soncare'. At the bottom of the page is a 'Screenshot' button.

The screenshot shows a search result page titled "Search Result". On the left, there's a sidebar with "SUB CATEGORIES" including SANITARY PADS, UNDER PADS, ADULT DIAPERS, KIDS DIAPERS, CAPS1, CAPS, CAPS, and SYRUP. Below that is a "SHOP BY" section with a "Category" dropdown showing Head Caps, Pads, Face Mask, and Diapers. The main content area displays a product card for "Face Mask" with a green box image, a 5-star rating, the price "Rs. 400", and an "Add to cart" button.

- **Add to cart** - By clicking the add to cart option on the selected product, the user can add it to his cart. By clicking on the cart button, he may see what's in his cart. In the cart, you can see all of the products that have been added. By selecting delete, the user can remove an item from the cart.

The screenshot shows a shopping cart page titled "My Cart". The top navigation bar includes links for HOME, HEAD CAPS, PADS, FACE MASK, DIAPERS, WET WIPES, and NEBULISER. The main content area shows a table with a single item: "FACE MASK" (image, 5-star rating, 0 reviews), quantity 1, price "RS 400.00", shipping "RS 10.00", and grand total "410.00". Buttons for "CONTINUE SHOPPING" and "UPDATE SHOPPING CART" are visible. At the bottom, there are sections for "SHIPPING ADDRESS", "BILLING ADDRESS", and "GRAND TOTAL 410.00".

- **Submit cart** - After confirming the goods in the basket and entering a delivery address, the customer is able to submit the cart. After a successful submission, the cart will be removed.
- **Make Payment** - The consumer has two payment options after submitting their shopping cart: through the internet or cash on delivery.

The screenshot shows a web browser window for 'Shopping Portal | Payment Method'. The URL is 'localhost/metasurgical/payment-method.php'. The page title is 'Meta Surgical'. The top navigation bar includes links for 'Welcome - shiva', 'My Account', 'Wishlist', 'My Cart', 'Admin', and 'Logout'. A yellow header bar contains the 'Meta Surgical' logo, a search bar with placeholder 'Search here...', and a shopping cart icon showing 'CART - ₹3,410.00'. Below the header is a navigation menu with links for 'HOME', 'HEAD CAPS', 'PADS', 'FACE MASK', 'DIAPERS', 'WET WIPES', and 'NEBULISER'. The main content area is titled 'CHOOSE PAYMENT METHOD' and contains a form with the heading 'SELECT YOUR PAYMENT METHOD'. It features three radio buttons: 'COD' (selected), 'Internet Banking', and 'Debit / Credit card'. A 'submit' button is at the bottom of the form.

- **Track Order** - The user may follow the order using the order id when the payment is completed and the transaction is confirmed.

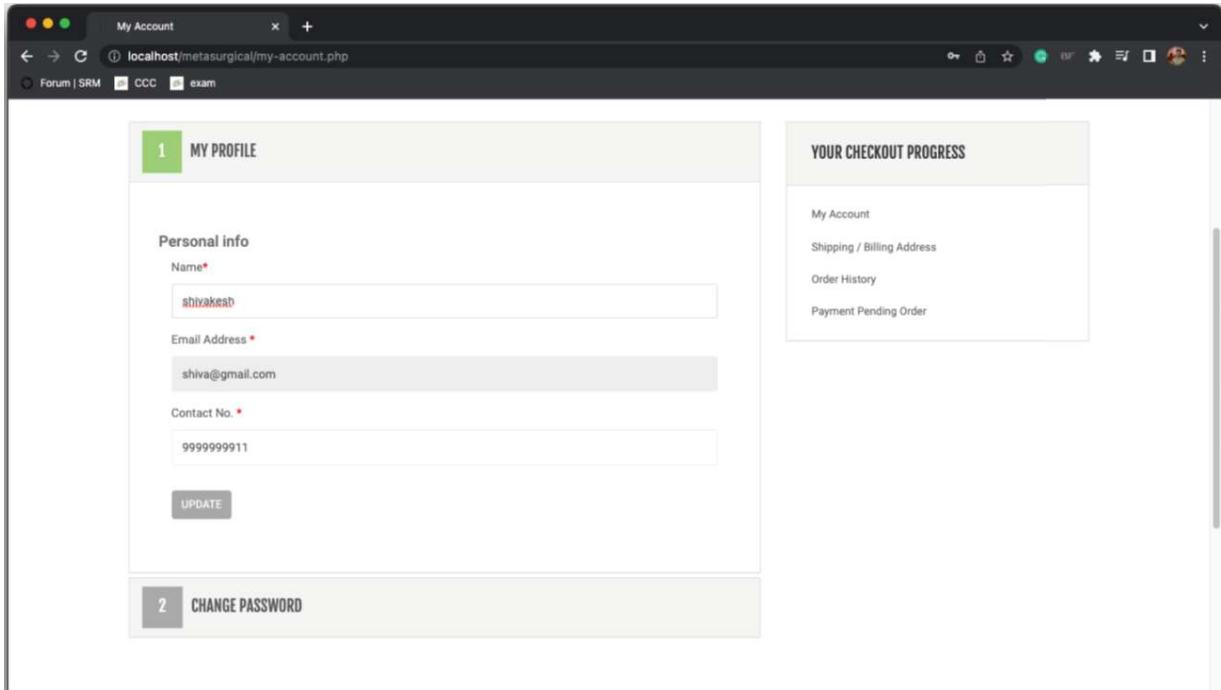

The screenshot shows a web browser window for 'Order Tracking Details'. The URL is 'localhost/metasurgical/track-order.php?oid=15'. The page title is 'Order Tracking Details !'. The top navigation bar includes links for 'Logout', 'Search' (with placeholder 'Search here...'), and a shopping cart icon showing 'CART - ₹3,00.00'. Below the header is a navigation menu with links for 'DIAPERS', 'WET WIPES', and 'NEBULISER'. The main content area is titled 'Order Tracking Details !' and displays the following information:

order Id:	15
Order Not Process Yet	

At the bottom of the page, there is a table showing order details:

Item Per unit	Shipping Charge	Grandtotal	Payment Method	Order Date	Action
400	10	410	COD	2022-05-03 09:32:18	Track

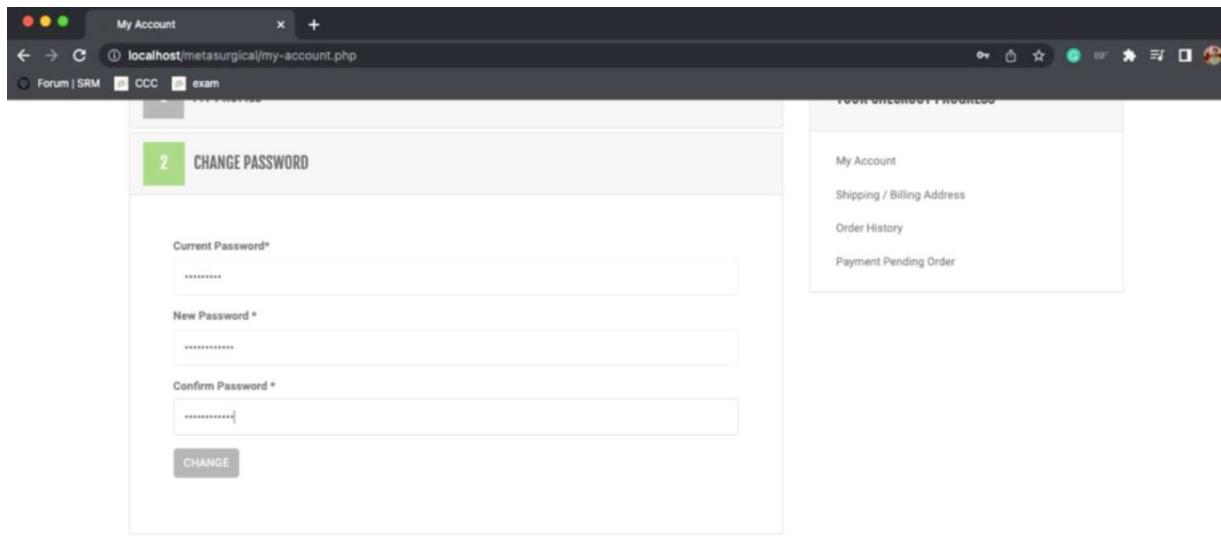

- **Edit Profile** - The User can view and edit the profile.

The screenshot shows a web browser window titled "My Account" with the URL "localhost/metasurgical/my-account.php". The main content area is divided into sections:

- 1 MY PROFILE**: Contains fields for Name (shivakash), Email Address (shiva@gmail.com), and Contact No. (9999999911). A "UPDATE" button is present.
- 2 CHANGE PASSWORD**: Fields for Current Password, New Password, and Confirm Password are shown.
- YOUR CHECKOUT PROGRESS**: A sidebar listing "My Account", "Shipping / Billing Address", "Order History", and "Payment Pending Order".

- **Change Password** - The user can edit the password of his account
